ZeeOS Web Management Console (WMC)

A powerful tool to mange your ZeeOS devices

What is ZeeOS Web Management Console ?

The ZeeOS Web Management Console (WMC) is the web-based centralized console for managing your ZeeOS devices. It helps you perform actions directly on your devices with a few clicks.
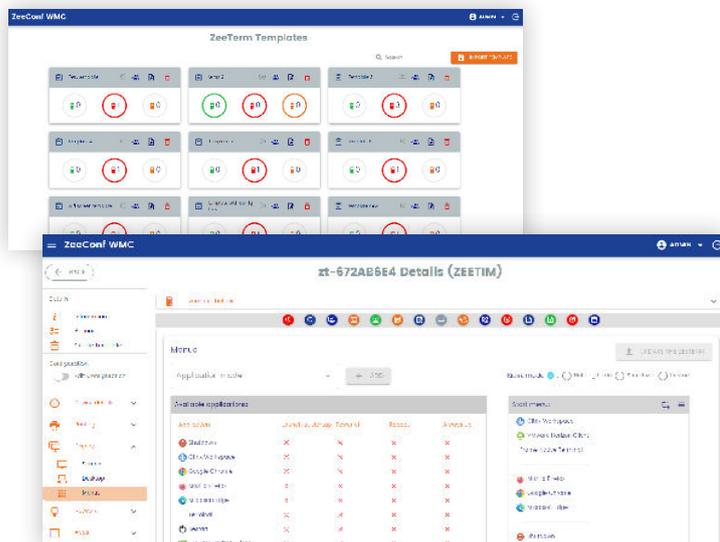

The objective is to both simplify and improve IT operations and free up helpdesk teams. WMC offers you the ability to do remote support: issues can be solved in a few clicks and within minutes.

Moreover, firmware updates can be deployed almost instantly from the management console.

WMC comes complimentary with every device, no matter if the Device is a hardware acquired from ZeeTim or a PC that has been converted to a ZeeTim device with ZeeOS....

Benefits

- **Save time** for your IT teams from constant patching, and maintaining antivirus tools,
- Configure your devices in a few minutes thanks to WMC, and deploy them in a "**Zero Touch**" manner,
- **Single point of connection**, from which thousands of devices can be managed and supported locally, anywhere in the world,
- No need to manage each workstation individually or send support teams to remote sites anymore,
- Perfect pick for **multi-site organizations** and decentralized agencies,
- WMC remains accessible with a standard Internet connection, even if out of the company network,
- No need for a VPN, your teams can securely manage their devices and benefit from WMC features even when working from home or from external sites,
- **Fully included** when purchasing a proprietary ZeeTim device or a ZeeOS license.

They use WMC

Technical characteristics

PREREQUISITES
